Contents of Volume 30

Editorial 1

Mathematical simulation of the performance of a single tube of a commercial reactor for methane steam catalytic conversion: comparison of one- and two-dimensional pseudo-homogeneous models. 3
D. Ziółkowski and S. Szustek (Warsaw, Poland)

Rolling ball viscometry for Newtonian and power law liquids 11
A. Bagchi and R. P. Chhabra (Kanpur, India)

Techno-economic optimization of isomerization of maleic acid to fumaric acid using ammonium bromide as a soluble catalyst 15
J. R. González-Velasco, M. A. Gutiérrez-Ortiz, J. I. Gutiérrez-Ortiz, M. P. González-Marcos and J. A. González-Marcos (Bilbao, Spain)

Micromixing and fast chemical reactions in static mixers 23
J. R. Bourne and H. Maire (Zurich, Switzerland)

Contact drying modelling of agitated porous alumina beads 31
A. Gevaudan and J. Andrieu (Villeurbanne, France)

Compressible gas–liquid flow through pipeline restrictions 39
S. D. Morris (Ispra, Italy)

Optimization method for balance adjustment in large chemical process systems. 45
J. Markoš and M. Barto (Bratislava, Czechoslovakia)

A contribution to the scale-up of fluidized bed driers and conversion from batchwise to continuous operation 51
W. Liedy and K. Hilligardt (Ludwigshafen, F.R.G.)

BOOK REVIEWS. 59

An experimental study of free fall of cones in Newtonian and non-Newtonian media: drag coefficient and wall effects 61
M. K. Sharma and R. P. Chhabra (Kanpur, India)

Mass transfer in supercritical fluid extraction of a binary aromatic mixture, naphthalene and phenanthrene, from porous rods 69
A. Dams and E. U. Schlünder (Karlsruhe, F.R.G.)

Analysis of thermal effects in packed bed liquid desiccant dehumidifiers 79
M. Sadasivam and A. R. Balakrishnan (Madras, India)

Estimation of drying rate curves for nonhygroscopic porous slabs using the characteristic function for the regular regime. 87
M. Yoshida, H. Imakoma and M. Okazaki (Kyoto, Japan)

Kinetics of sulphation of limestone and precalcined limestone 97
D. N. Spartinos and C. G. Vayenas (Patras, Greece)

A new method in investigations of bubble cluster shapes in two-phase flow 107
Z. Garncarek, J. Idzik and W. Spisak (Opole, Poland)

Marangoni instability during the absorption of carbon dioxide into aqueous solutions of monoethanolamine . . . 113
K. Warmuziński and M. Tańczyk (Gliwice, Poland)

BOOK REVIEWS. 123

Transport phenomena over partially active surfaces. 125
A. Stammer, W. Büssing and E. U. Schlünder (Karlsruhe, F.R.G.)

Kinetics and slurry-type reactor modelling during catalytic hydrogenation of *o*-cresol on Ni/SiO_2 133
H. Hichri, A. Accary and J. Andrieu (Villeurbanne, France)

Kinetics and mechanism of ethyl *tert*-butyl ether liquid-phase synthesis. 141
O. Françoisse and F. C. Thyrion (Louvain-la-Neuve, Belgium)

Chem. Eng. Process., 30 (1991) 183–184 © Elsevier Sequoia/Printed in The Netherlands

Simulation of water and mineral oil condensation during the cooling of a paper web on a cooling roller 151
C. Schuster (Darmstadt, F.R.G.)

Heat transfer to trickling granular materials 157
J. Guderian (Oberhausen, F.R.G.), D. Köneke and P.-M. Weinspach (Dortmund, F.R.G.)
